

# Cups & Coffee

August 26 - September 18, 2011

*Cups & Coffee* includes the work of ceramicists from across the U.S. and looks at America's love affair with coffee and coffee shops while focusing on a singular form, the mug. The exhibition demonstrates the endless approaches one can take in articulating a singular form. Mugs of all shapes and sizes, made of different clay bodies and with different surface treatments at low, mid-range and high-fired temperatures, bright colors and earth tones, classic and bold, one, two and three finger mugs are all represented. Over one hundred of North America's finest ceramic artists will be participating in the exhibition.
